Over the last twenty-five years Humanities West has brought together regional, national, and international scholars and artists to present lectures, performances, readings and discussions to audiences in San Francisco's Herbst Theatre. These one- or two-day events represent an opportunity unique not only to the Bay Area, but also to the entire United States. Designed to both entertain and educate, Humanities West has continued to offer presentations on a wide-range of topics encompassing the fine arts, social history, music, politics and philosophy of the arts. The lively combination of lectures and performances provide a form of "armchair travel" for audiences, offering a departure through time in an effort to illuminate and elevate the human spirit. Highlights from past years include "trips" to Italy, France, India, and China; and "meetings" with the likes of Marco Polo, Pericles, Napoleon, and Genghis Khan. Presenters have included noted scholars from distinguished universities, international dignitaries, acclaimed best-selling authors, and world-class performers.

Humanities West continues this ambitious tradition into its 25<sup>th</sup> Anniversary Season, opening with *Copernicus, Galileo and Kepler: Redefining Our Place in the Universe*, on October 2 - 3, 2009 in honor of the International Year of Astronomy and commemorating the 400th anniversary of modern astronomy and Galileo's first use of the telescope in 1609. The second program, *Alexander/Alexandria: The Flowering of Hellenistic Culture*, on February 5 - 6, 2010, examines the interplay of cultures in Hellenistic Egypt following Alexander's death in 323 BCE. Greek literature, learning, and art intermingled with Egyptian, Persian, Babylonian, and Hebrew cultures resulting in both conflict and convergence. The season culminates with *The Florence of the Medici: Commerce, Power, and Art in Renaissance Italy* on February 5 - 6, 2010, exploring the torrent of artistic and intellectual creativity that took place in Florence between the 14th and 17th centuries, which eventually came to shape modern culture of the western world.
